PROFESSIONAL SUMMARY

Data Analyst and BI-focused Computer Engineering student with hands-on experience building cloud-native analytics systems, end-to-end ELT pipelines, and AI-powered data applications using AWS, Snowflake, dbt, Power BI, and LangChain. Built production-style systems processing 13M+ records across real-world analytics workflows. Google Business Intelligence Professional Certified. Open to Data Analyst, BI, and Analytics Engineering internships..

TECHNICAL SKILLS

BI & Visualization: Power BI (DAX), Tableau, Google Looker Studio, Excel

Data Engineering: dbt Core, Snowflake, AWS Glue ETL

Cloud: AWS (S3, IAM, Glue, Athena, Lambda, CloudWatch), GCP (BigQuery, Cloud Console)

AI & LLM: LangChain, Groq API, Prompt Engineering, Streamlit, RAG (conceptual)

Programming: Python (Pandas, NumPy, Matplotlib, Boto3, LangChain), SQL (MySQL, BigQuery)

Analytics: KPI Development, Dashboard Design, EDA, Dimensional Modeling, Star Schema, ETL/ELT

Other: Git & GitHub, Data Quality Testing, dbt Lineage, Stakeholder Reporting

EXPERIENCE

WOSTUP — Business Intelligence & Operations Lead

Jan 2026 – Present

- Supporting business operations and growth strategy for an early-stage AI workforce intelligence and automation platform
- Conducting R&D and market research to identify product positioning, competitive landscape, and go-to-market opportunities
- Leading outreach, pitching, and marketing initiatives to drive early user acquisition and stakeholder engagement
- Tracking and analyzing startup growth metrics to support data-driven strategic decision-making across the platform

PROJECTS

Indian Aviation Intelligence System

2026

Tools: AWS S3 · Glue ETL · Athena · Lambda · Power BI · Python (Pandas, Boto3) · SQL

- Architected serverless data lake on AWS S3 with structured raw/processed/output layers following industry data lake design patterns
- Built AWS Glue ETL job in Python processing 50,000 Indian flight records with 8 derived columns including route classification, price categorization, and weekend detection
- Implemented event-driven ETL automation using S3 triggers and AWS Lambda — new file uploads automatically trigger processing pipeline with zero manual intervention
- Queried processed data lake using Amazon Athena uncovering key insights: Vistara leads premium pricing, DEL-BOM is busiest route with 2,265 flights, February peaks travel demand
- Built live Power BI dashboard connected to Athena via ODBC featuring 3 analytical pages with forecasting visuals on 50,000 row dataset

Zomato Restaurant Analytics Pipeline

2026

Tools: Snowflake · dbt Core · Tableau · Python · SQL

- Built end-to-end ELT pipeline ingesting 51,719 Zomato restaurant records into Snowflake via stage-based COPY INTO loading
- Designed 2-layer dbt transformation architecture (staging + mart models) with data cleaning, type casting, and business logic including rating categorization (Excellent/Good/Average/Poor)
- Implemented 6 automated dbt data quality tests (not_null, accepted_values) identifying and resolving null-location records in source data upstream
- Generated automated data lineage documentation using dbt docs; connected Tableau to Snowflake mart model and published interactive dashboard on Tableau Public

CSV Chat AI — Conversational Analytics App

2026

Tools: LangChain · Groq API · Llama 3.1 · Streamlit · Python · Pandas

- Built AI-powered web app enabling natural language querying of any CSV dataset — users upload a file and ask questions in plain English, receiving instant data-driven answers
- Implemented LangChain CSV agent using ReAct reasoning pattern where Llama 3.1 8B LLM autonomously writes and executes pandas code to answer analytical questions

- Deployed live on Streamlit Cloud with persistent chat history via session_state — publicly accessible at csv-chat-ai.streamlit.app

Cyclistic Bike Share Demand Analysis

2026

Tools: Power BI · Google BigQuery · SQL · DAX · Google Cloud Console

- Built end-to-end BI workflow using Google BigQuery and Power BI to analyze 13M+ bike-share trip records, transforming raw public datasets into structured analytical tables
- Developed interactive Power BI dashboards with 8+ KPIs including total trips, trip duration, station utilization, and rider distribution across 3 stakeholder-focused reports
- Identified peak riding hours, busiest stations, and behavioral differences between subscriber and casual riders to support station capacity and demand management decisions

Retail Sales & Profit Intelligence System

2025

Tools: SQL (MySQL) · Power BI · Data Modelling · Star Schema

- Built multi-page BI system analyzing 5K+ retail transactions generating \$2.3M+ in sales, using star schema with 1 fact table and 4 dimension tables (Customer, Product, Date, Geography)
- Developed 15+ interactive KPIs including total sales, profit margin (12.47%), and YoY growth (46.88%) across role-based dashboards: Executive Overview, Sales Intelligence, and Product Analytics

CERTIFICATIONS

Google Business Intelligence Professional Certificate

Coursera · 2026

- Completed end-to-end BI workflow covering data extraction, transformation, visualization, and dashboard design
- Built dashboards in Power BI; worked with BigQuery cloud datasets and advanced SQL analysis

Product Analytics Certification

Pendo.io · 2026

- Analyzed user behavior data including engagement, retention, and feature adoption metrics

EDUCATION

Bachelor of Engineering – Computer Engineering · CGPA: 8.73

2027

Trinity Academy of Engineering, Pune

Higher Secondary Education (PCMB)

2023

Vishwakarma College of Arts, Commerce and Science, Pune

Secondary School Education

2021

The Bishops Co-Ed School, Undri, Pune

LEADERSHIP & ACTIVITIES

- **Core Team Member, Trinovate** — Part of the organizing core team for Trinovate, a technical fest with 500+ student participants across events and competitions.
- **Technical Team Member, GDGoC (Google Developer Groups on Campus)** — Contributed to technical initiatives, workshops, and developer community events under the Google Developers Group chapter.
- **Member, ACES (Association of Computer Engineering Students)** — Active member of the computer engineering student association, participating in technical and academic activities.
- **Public Speaker** – Delivered technical sessions on data analytics workflows to student audiences during campus events
